

## THE COMPLETE SHOEMAKING SERVICE BOMBELLI

The BOMBELLI Company operates in two sectors: distribution and service for shoe industries and leather goods plant.

It has already been the leader in the national and international markets for years. An efficient and qualified network of agents guarantees the Brand name in domestic and foreign markets. Large range of products, wide price range, dedicated employees, competent and willing: these are the characteristics of BOMBELLI's organization. Through a close collaboration with the most important shoes factories, it participates as a principal feature in the most important events in the world.

BOMBELLI can draw upon a wealth of talent, knowledge and special skills to provide a shoemaking service second to none. It is a professional export organization well versed in financial liaisons with world banks and national governments.

BOMBELLI supplies machinery for every shoemaking process, from simple machines for leather cutting and manmade materials, to computer controlled graduating cutting machines. Each machine is regularly tested to ensure it meets the highest standards in quality, craftsmanship and reliability.

Bombelli has now reached the high standards of technology with the new Cad Cam systems. These same high standards are maintained in shoes materials manufacturing, in order to meet the exact requirements of the footwear industry worldwide. Each product undergoes extensive laboratory tests before being made available to customers. The specialists who make up BOMBELLI's unique factory planning team are ready and equipped to tackle shoes factory installation of a complete new factory, BOMBELLI can help. It can provide comprehensive advice on every aspect of the shoemaking process, from planning and layout to power supplies, production control and associated systems.

As an additional service, BOMBELLI has shoemaking experts on call to provide practical solutions to every technical problem which a factory may have. In recent years this team of professionals has been responsible for the installation of shoe factories across the world, from China to Russia, Europe, The Middle East, Africa, U.S.A. and West Indies. In-depth technical training is available either on the site or at BOMBELLI's headquarters in Italy and this ensures that costumers are fully conversant with the materials and techniques needed for their productions. No matter how large or small the installation is, the costumer is assured of the best machines and systems, planned and installed by the world's experts in the shoes factory production.

BOMBELLI machines and materials at the forefront of footwear technology, and that is a position that can be largely attributed to the endeavor and expertise of the Group's highly skilled research and development personnel.

Whatever the production line is, no other manufacturer in the world can offer such a comprehensive range of machinery. BOMBELLI has the experience and know-how to supply the machinery that is right for every job: from factories making classic-style shoes and high fashion footwear, to industrial boots and training shoes. Whether a factory employs 10 or 1000

people, BOMBELLI can provide practical solutions and machines designed with modern shoemaking in mind.

BOMBELLI moreover provides a comprehensive range of products for today's shoemaker: thermoplastic or solvent activated toe puffs and counters, eyelets, steel shanks; indeed almost everything that goes into making a shoe.

We list below a selection of some costumers to whom we have supplied complete factories or major additions to existing facilities in recent years.
